Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-3, 5-10, 12-14 are rejected under 35 U.S.C. 102(e) as being anticipated by Takagaki (U.S. Patent Application Publication No. US 2002/0065066).

Regarding claims 1, 5-6, 8, 12-14, Takagaki teaches an information retrieval system comprising: a server to transmit audio and/or visual information in a limited space; and a hand-held device capable of two-way communication with the server while the hand-held device is located in the limited space that is a communications area covered by the server, the server transmitting relevant information on the audio and/or visual information to the hand-held device in response to a request made by the hand-held device (paragraph 0035; Fig. 2).

Regarding claims 2, 9, Takagaki teaches the information retrieval system according to claim 1 further comprising: first communications means via which the hand-held device and the server communicate with each other (e.g., receiver); and second communications means (e.g., transmitter) via which further relevant information on the audio and/or visual information is accessed based on the relevant information retrieved to the hand-held device.

Art Unit: 2681

Regarding claims 3, 10, Takagaki teaches the information retrieval system according to claim 1, wherein the relevant information includes URL (Uniform Resource Locator) for accessing Web pages (paragraph 0033).

Regarding claim 7, Takagaki teaches the information retrieval system according to claim 6, wherein the audio and/or visual information carries a code peculiar to the information, the information being identified by using the peculiar code (paragraph 0033).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 4 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Takagaki (U.S. Patent Application Publication No. US 2002/0065066).

Regarding claims 4 and 11, bluetooth technology has been known in the art for standardizing wireless transmission between a wide variety of devices by creating a single digital wireless protocol for use by various mobile devices that need to keep data synchronized (i.e., consistent from one device to another). Therefore, it would have been obvious to one of ordinary skill in the art to use bluetooth for the reason said above.
